

PURUM KRAFT®

Purely Ecological Solution

PURUMKRAFT®

PURUMKRAFT is a Czech environmental group that includes the following companies:

PURUMKRAFT®

PURUM®

aquatest

SGGEOTECHNIKA®

PROFISTAV
Litomyšl a.s.

UVR®
MNÍŠEK POD BRDY

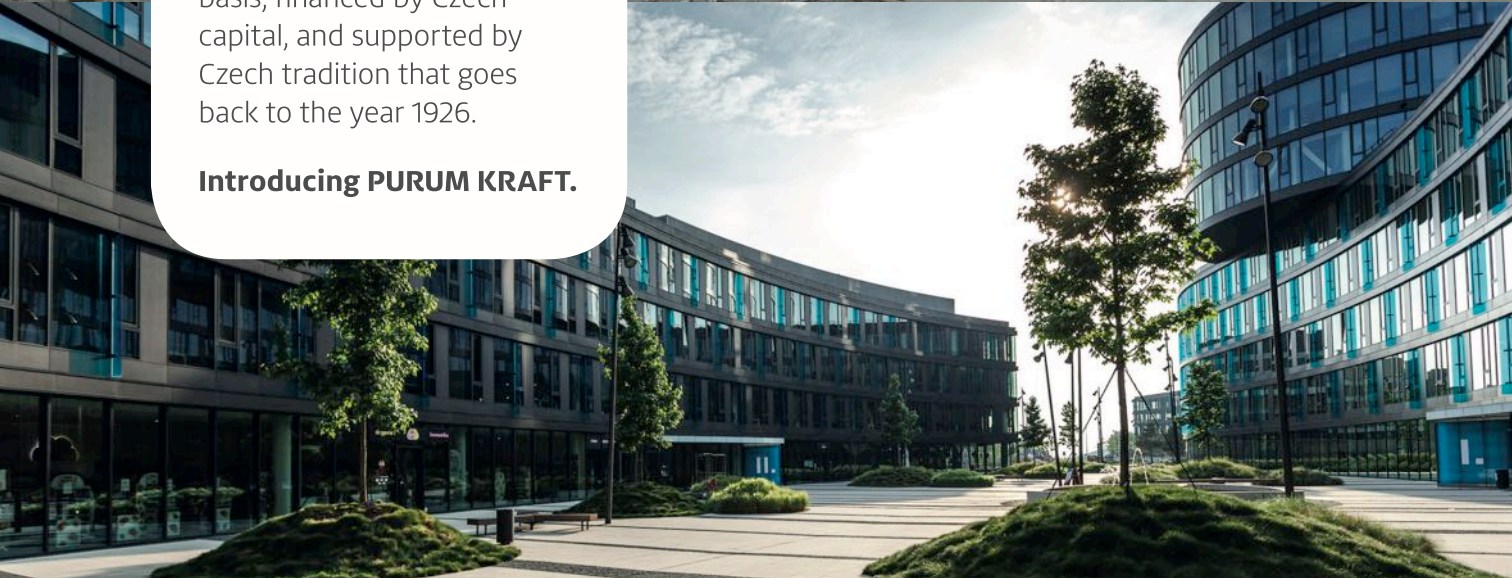

PURUM KRAFT companies provide a comprehensive portfolio of **ecology and environmental** products and services in such fields as environmental protection, nature conservation, and related fields – water management, waste management, energy, construction, and transport.

PURUMKRAFT®

We support modern ecological trends and **strive to create a clean environment** with a view to protecting it and preserving it for the generations to come. Our mission is to provide a comprehensive array of top-quality, reliable environmental services.

All our products and services are available on a one-stop basis, financed by Czech capital, and supported by Czech tradition that goes back to the year 1926.

Introducing PURUM KRAFT.

Purely ecological solution

Purum provides **comprehensive ecological solutions for waste management**, where waste is regarded as a resource with a view to ensuring sustainable development and nature conservation. Purum specializes in the ecological processing, recycling, energy recovery, and disposal of **all types of waste**. Purum provides a **comprehensive portfolio of waste management services** on an outsourcing basis with a focus on industrial clients and water management operations, including consulting and legal services. Purum operates throughout the Czech Republic, and its services are also available in Slovakia.

Our clients

PETROF
SPOLCHEMIE
Panasonic
Aircraft Industries
UNIPETROL

Specializations:

- Waste collection, salvage, and purchase
- Comprehensive waste management
- Secondary raw materials and circular economy
- Water services
- Plastic recycling
- Disposal of liquid hazardous waste
- Energy recovery and waste incineration
- ADR-TRANS Division – transport of waste and chemical substances in accordance with the ADR standard
- Environmental consulting

Chemical Safety Division

The Chemical Safety Division is a leader on the Czech market for the recycling of gas and pressurized bottles. The Chemical Safety Division processes technical gases and provides a wide array of chemical safety services, including legal services relating to environmental protection.

EKOPUR Division

In the Service of Healthcare

The division specializes in decontaminating and recovering energy from waste generated in healthcare, including all related legal tasks.

Only through knowledge can we protect

AQUATEST is a **leading provider of environmental services** in the Czech Republic. We provide consulting and engineering services in the fields of **water and waste management, environmental protection, and contaminated land remediation** on an unprecedented scale from conceptual design to implementation. The quality of services is supported by own **research and development** carried out in cooperation with leading experts and institutions. AQUATEST conducts business in the Czech Republic, Slovakia, Bulgaria and Ethiopia.

Specializations:

- Environmental remediation, comprehensive solutions to environmental pollution and territorial revitalization
- Comprehensive hydrogeology, hydrology, mineral water, and environmental protection services
- Water management services – development, construction, and operation of wastewater treatment technologies for industrial and municipal applications
- Waste management, waste recycling, recovery of secondary raw materials
- Accredited laboratory services in the field of environmental analyses
- Research and development

Tradition of Czech Science

UVR Mníšek pod Brdy a.s. relies on a tradition of more than 50 years of prospecting for minerals, executing environmental projects, and performing expert assessments. The company is currently working on a project involving the development of the Research and Development Park in Mníšek pod Brdy into a zone for business activities in the area of environmental technologies, research and development, and training. In addition, the company manages a former lignite mine in Mikulčice u Hodonína. Its mining infrastructure and surface facilities are used for environmental operations.

Specializations:

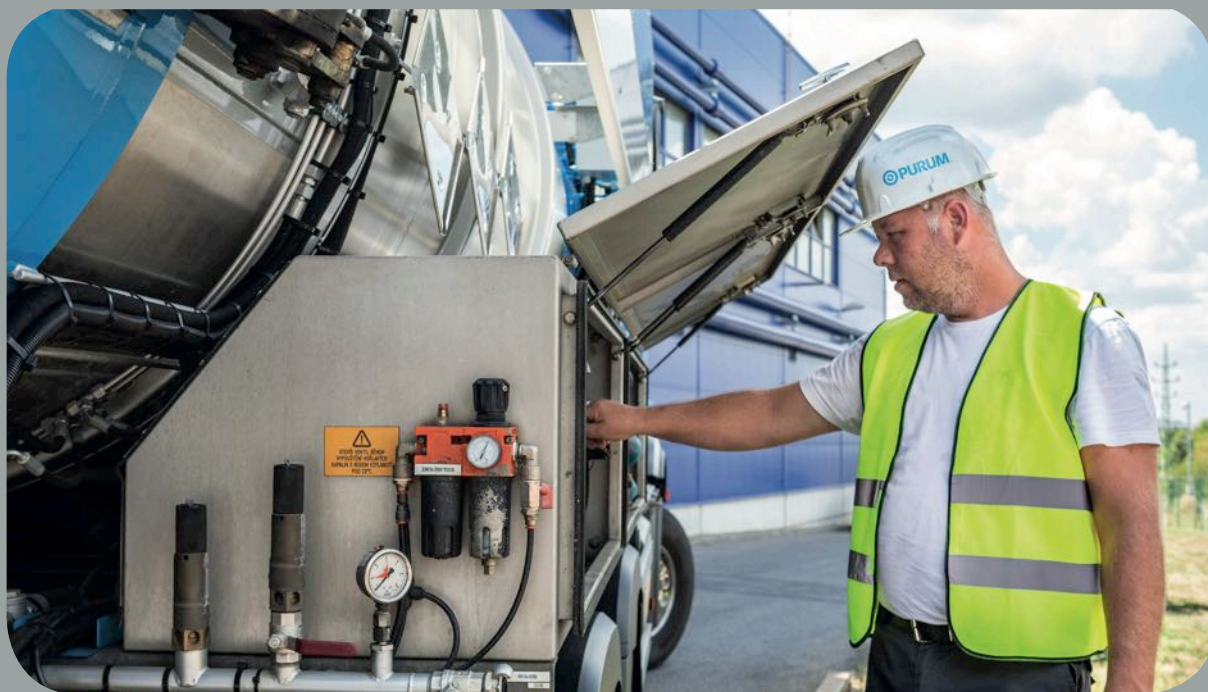

- Center for human resources training and development
- Research and development park
- Photovoltaic power station
- Management of a lignite mine in Mikulčice u Hodonína

Our clients

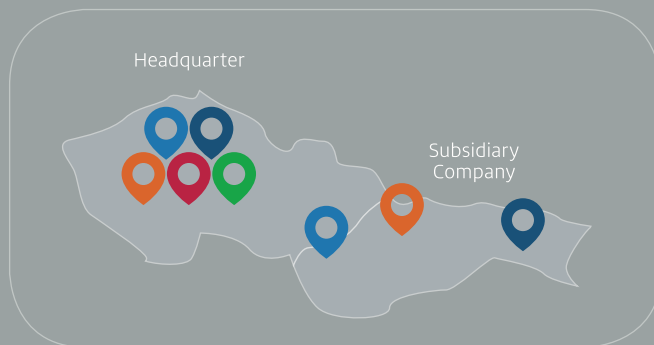

Moravské naftové doly
City of Mníšek pod Brdy
City of Mikulčice
Příbramská teplárenská

PURUM KRAFT comprises leading Czech companies providing the full spectrum of environmental services. PURUM KRAFT symbolizes the Czech tradition of tried and tested quality. Our services rely on verified processes, experience, and proprietary research and development. Our top experts guarantee professionalism and state-of-the-art methods.

We supply comprehensive environmental services worldwide.
